THE BOARD OF TRADE RETURNS.

THE returns of our foreign trade for the month of November show a rather considerable falling-off in the value of imports, the total amounting to £35,236,800, as compared with £35,802,000 in the corresponding month last year, being a decrease of £565,200, or 1 6 per cent. The decline extends to most of the principal classes of raw materials, but, except in the case of textiles, the shrinkage in values is comparatively small, and is mainly accounted for by the fall in prices which has taken place this year. On the export side the showing is more satisfactory, the total value of British products exported during the month reaching £18,083,000, which is £429,300, or 2·4 per cent. more than the total for November, 1893. The following tables give a comparison of imports and exports for the month and eleven months with the corresponding periods of last year, and the increase or decrease under each of the principal heads :—

TOTAL IMPORTS.

	Nov., 1894.	Compared with Nov., 1893.	Eleven Months, 1894.	Compared with 1893.

Total exports	22,508,413	+ 810,062 = 3 7 %	251,832,277	— 4,095,067 = 1·6 %

Our imports of breadstuffs last month were on abou the same scale as regards quantity as in the correspondin month last year. The quantities received from the different sources of supply have, however, varied considerably. Thus our imports of wheat from the River Plate and Australia were largely in excess of the corresponding month, but this increase was more than counterbalanced by a decline in the shipments from Russia and India. In the eleven months of 1894 we have received from Argentina 12,500,000 cwts of wheat, against only 17,500,000 cwts in the same period last year; from Russia, 14,800,000 cwts, against 8,300,000 cwts; while the United States shipments have declined from 30,800,000 to 23,300,000 cwts; and Indian from 5,500,000 to 5,000,000 cwts. Among other foodstuffs, imports of bacon from Denmark and the United States have fallen off. Australasian mutton shows a further increase, while there is a rather heavy decline in the importation of Canadian cheese, though for the eleven months the quantity received is larger than last year. The fall in the price of sugar has been exceptionally heavy, but owing to the larger quantities imported, mainly from Germany, the value is about equal to that of the receipts in November, 1893. For the eleven months our imports of refined sugar have largely exceeded those of the corresponding period last year, but imports of raw sugar have declined to the extent of 1,200,000 cwts, and the value has fallen from £10,466,000 to £7,878,000, the percentages of decline in quantity and value being 8·1 and 24·7 respectively.

The principal feature in the imports of raw materials is the heavy decrease in the value of cotton. This is due to the recent almost unprecedented fall in price in connection with the estimates of a crop of extraordinary dimensions. The decrease in the weight imported is less than one per cent., while the fall in value is about 21 per cent. Our cotton imports for the current year are well ahead of those in the eleven months of 1893, showing an increase of 31·7 per cent. in quantity, and 14·3 per cent. in value. Jute, hemp, and flax were each imported in larger quantities, the increased supply of hemp coming mainly from the Philippine Islands. Partly, perhaps, owing to the interruption of commerce from the war, there was last month an almost entire stoppage of our importation of silk from China and Japan. As regards crude minerals imported, our receipts of copper regulus and unwrought copper from the United States show a great shrinkage. Spanish iron ore was imported more freely, while a decline is shown in lead

and silver ore. Although we received more tin than in November last year, its value was considerably less. A further large increase appears in the quantity of tallow sent from Australasia, the receipts from other countries except Argentina being smaller than they were last year.

We give below particulars of the principal miscellaneous imports. A decrease is shown in our imports of cottonseed both for the month and the eleven months. The supply of cottonseed is derived almost entirely from Egypt. The larger supplies of flaxseed came chiefly from India. Petroleum shows a continual expansion in quantity, but here again the fall in prices is indicated by the fact that while we imported upwards of 2,000,000 gallons more last month than in November two years ago, its value was £23,000 less. Nitrate of soda has recently been arriving in much larger quantities. Last month the value imported was about £80,000, against only £6,000 in November, 1893.

Our exports of coal for the month show an increase of 460,000 tons in quantity and £75,000 in value, equal to 21·0 per cent. and 5·8 per cent. respectively. The comparison in this case is with the period of the strike, when the volume of exports was restricted, and the values relatively higher. The quantity shipped in the eleven months of this year, however, is substantially larger than in the corresponding period of 1892. As regards textiles, the prominent feature of the trade in cotton goods is the decline in value. A larger quantity of piece-goods was shipped last month than in the same period of either 1893 or 1892. A comparatively slight shrinkage is shown in the exports to Germany, Belgium, France, Portugal, Egypt, and China, but shipments to India were on a much larger scale, and there was some increase in the quantity sent to Turkey, the United States, Morocco, Brazil, and Argentina. It is a noteworthy feature in connection with the cotton industry that notwithstanding the lower prices our exports of piece goods this year have exceeded in value those of the eleven months of 1893, by £3,348,000, and of 1892 by £1,775,000. The only feature in our exports of woollen and worsted goods for the month is the recovery in our trade with the United States, which took more than double the quantity of worsted fabrics the value of the shipments thither being £121,300, against £61,400 in November, 1893. The total still falls very much below that of 1892, when the quantity shipped during the month was 2,914,200 yards, as compared with 1,787,800 yards this year. A notable feature of the month's returns is the indication they afford of recovery in our iron and steel industries. In our exports of metal manufactures there is an increase in value of 9·1 per cent., while in iron and steel goods the increase in value is 15·2 per cent., and in quantity 27·2 per cent. The expansion, too, is fairly general throughout the wide classification adopted for the various descriptions of iron and steel manufactures. The largest individual items of increase are in railroad iron for India; and cutlery, tin-plates, and unwrought steel for the United States. There is but little that calls for remark among the exports of miscellaneous articles, the volume of trade being generally somewhat above last year's level, while values have barely kept up to that level owing to the lower prices.

Reshipments of foreign produce show a further substantial increase, which is again seen mainly in the re-exports of wool. The London sales of the colonial product appear to be again attracting foreign buyers, a large increase appearing in the reshipments to all the European countries, except Belgium, while the United States last month took 5,726,000 lbs, against only 1,693,000 lbs in November 1893.

THE PROPOSED COMMERCIAL COURT.

From time to time statements have recently been made that a Commercial Court is in process of constitution. The establishing of such a Court would be so remarkable a departure from the existing organisation of the English judiciary, that it appears desirable to consider what is required in order to make any such Court successful in dealing with commercial business.

To establish a Court of the kind is a more difficult task than may be at first supposed. It is obvious that it would be useless to constitute a Commercial Court unless it is to be open throughout the legal year. The change, therefore, at once raises the circuit question, and since if a judge of the Queen's Bench Division is detached for this special work, there will then be one judge less available for the performance of judicial work in the provinces, it is the business of those who have taken in hand the organisation of the new Commercial Court to overcome this difficulty; but unless the Lord Chancellor and the Lord Chief Justice are prepared to accept this first essential of a Commercial Court—viz., that it should be open at all times in the legal year—they are merely wasting time in attempting to pass back commercial business to the High Court. For it must further be borne in mind that the Judge of the Commercial Court must also deal with such interlocutory business in chambers which is fixed for a judge as belongs to the commercial cases that are allotted to him, just as the judge of the Admiralty Court deals with certain phases of Admiralty litigation in Chambers. Apart, therefore, from the New Court work the presence of a judge will be permanently required to dispose of the interlocutory business. This again leads to the notice of a further essential for the satisfactory disposal of commercial litigation. Such interlocutory work as would be done by a Master of the Queen's Bench Division must be disposed of by a Master allotted to the Commercial Court, who must also tax the bills of cost. In other words there must be established a Commercial Division of the High Court. It may be possible that by retaining one of the ordinary Queen's Bench Masters and some of the clerks of that Division, for the purpose of the special class of work it may not be necessary to ask Parliament to establish a Commercial Division, separate from the Queen's Bench Division. But even if the judge, Master, and clerks are still in name a part of the Queen's Bench, they must be separate from it in fact.

The commercial work which has during the last two years flowed into the Admiralty Court would not have gone thither unless the Division of which that Court is a part had, so far as regards Admiralty business, had a separate register, a separate staff, and a separate judge. In other words, Admiralty business, and such shipping work of a common-law character as comes into the Admiralty Court, are disposed of in a compact and well organised judicial department. A similar department in fact, if not in name, must be established, if commercial business is to be drawn back to the High Court. Any half-hearted arrangement would do no more than make the disorganisation of the Queen's Bench Division more glaring than even it has lately been.

Again, in regard to the trial of actions, it is essential that arrangements should be made to bring cases on for trial on fixed days and without delay. Men of business cannot afford to waste their time about the law courts, nor to have business arrangements rendered uncertain, because it is impossible for their legal advisers to state definitely when an action will be heard. In Admiralty causes days are definitely fixed for certain cases, so that seamen may not be detained in the country at considerable expense to the parties. It is equally reasonable that witnesses and parties interested should not be put to expense in ordinary commercial cases by uncertainty in regard to the date of hearing. But in carrying out these and similar arrangements, it is essential that it should be done with a sincere desire to facilitate the convenience of parties, and not in a nominal manner. If a rule were made for fixing commercial cases on special days, it would be useless if too many actions were placed in the list for a particular day. These rules will be of no avail unless the judge, the Master, and the clerks are actuated by a desire to facilitate the convenient despatch of the business in the Commercial Court. In other words, it must be clearly understood that if commercial litigation is to come back to the Queen's Bench Division, it must be made perfectly apparent that the authorities recognise that the Courts are instituted for the suitors, and that the suitors are not persons who are at the best to be coldly tolerated. The

spirit in which rules of procedure are carried out is quite as important as the letter of the rule.

Further, as regards any references which may be necessary after the liability of the parties has been established in Court, we should certainly deprecate the utilisation of any of the existing official referees. If references have to be heard by a legal official, let it be by the Master of the Commercial Court assisted by a competent mercantile referee. As a matter of fact, however, we should doubt if there would be any large demand for the services of a legal referee, as in cases involving technical knowledge of commercial products, or the adjustment of average account, it would probably be the most satisfactory course to send the reference to some expert in the particular market, or to an average adjuster. Satisfactory as is the system in use in connection with Admiralty cases of references to one of the registrars assisted by one or two merchants, it must be borne in mind that they have to deal in nearly all instances with similar issues. These are the reasonableness of charges for repairs of ships, of rates of demurrage, and of the value of vessels which are totally lost. Even lawyers with such daily and weekly experience of particular technicalities become almost experts. But it would be quite different in regard to commercial cases of all sorts and kinds, and involving a judgment upon all sorts of commercial products. We have thus indicated some of the lines upon which this proposed reform must be carried out, if it is to have any chance of success. The legal authorities have hitherto shown so complete a want of knowledge of the requirements of men of business, and have appeared so ignorant of the effects of modern changes upon the relations of commerce and law, that we shall feel some pleasurable surprise if the Commercial Court is organised with that boldness and completeness which is essential to its success.

THE OTTOWA CONFERENCE.

Lord Jersey's exposition of the resolutions adopted at the Ottowa Conference cannot be said to present these in a favourable aspect so far as this country is concerned. "It was clearly the opinion of all the colonial delegates," writes Lord Jersey, "that it is desirable that the colonies represented should make arrangements with one another, and, if possible, with Great Britain, which would give British an advantage over foreign products, and that for this purpose any statutory or treaty provisions which stand in the way should be removed." And so far as regards preferential arrangements between the colonies themselves, there are no serious statutory or treaty difficulties standing in the way. The Australian colonies are, indeed, prohibited by statute from entering into differential tariff arrangements with other colonies or with foreign countries, although free to conclude such arrangements between themselves; but if they wish for the removal of that disability, and to be placed on the same footing as all the other colonies, the Imperial Government would not be justified in refusing to grant the freedom desired. And although our treaties with Belgium and the German Zollverein preclude the colonies from according preferential treatment to the products of the mother country, they do not prevent differential treatment by British colonies in favour of each other. An Inter-Colonial Customs Union is thus perfectly practicable, but whether it would be really attended with advantages to the colonies themselves is a different matter. Nothing is more certain than that if they create tariff discriminations against the products of foreign countries they will meet with reprisals, and, although their trade with such countries is small at present, their desire ought to be rather to have that trade extended than further circumscribed.

Of course, from the mother country they would have no reprisals to fear. But it would surely be an inauspicious beginning if what is intended to be an Inter-Imperial Commercial Union of the colonies were to start by imposing higher duties upon British than upon colonial products. It may be said that we would suffer little from such a policy, because there are few colonial products that compete with ours. There is, however, an appendix to the report which instances a number of articles which Australia and Canada might supply to one another, and there we find it suggested that Australian wool might be sent to Canada direct, instead of the trade being carried on, as now, mainly through this country. Australia also might, it is suggested, carry on under the favouring influence of a discriminating tariff, a trade with Canada in woollen goods, while under the same fostering influence Canada might develop a trade with Australia in paper, cotton goods, matches, agricultural implements, carriages and carriage materials, and paints and drugs. The intention, therefore, whatever might be the effect of the discriminating duties, would be to benefit some branches of colonial trade at the expense of British trade. And it certainly cannot be expected that a policy of that kind should be looked upon with favour here. Yet we are asked not only to favour, but to further it by granting a subsidy for a steamship service between Vancouver and Sydney, and for the construction of a Pacific cable so as to establish direct telegraphic communication between Canada and Australia. Of course, we are told that such new means of communication would subserve Imperial interest, but nevertheless the fact remains that it is primarily in the trade interests of the colonies that they are proposed, and that the expectation is that they will tend to divert from us some of the trade we now obtain.

It is true that we are to be offered participation in any tariff preferences which the colonies may accord to one another, provided we accord specially-favoured treatment to their products. So far, however, as tariff reductions are concerned, we already grant the colonies all the favour possible. With very few exceptions, their products are admitted here free of duty, and better treatment than that they cannot have. What they propose, therefore, is that we should impose duties upon foreign products, while leaving theirs free, and as to that Lord Jersey writes:—"It is an obvious consideration that the proposal would involve a fundamental change in the financial policy of Great Britain. A remission of duties in certain cases is of course easily effected in colonies which possess a heavy Customs tariff, as, for instance, when 25 per cent. is the ordinary charge; and it is proposed to reduce this in certain cases to 20 per cent. But in Great Britain the institution of a differential tariff would involve the special creation of a Customs tariff against all foreign Powers in respect of the articles, whatever they might be, which would have to be favoured on importation from the colonies. The proposal, in short, means in the colonies the remission of existing taxation, but in Great Britain the creation of new taxation; not a mere variation in the existing machinery, but the introduction of a new system."

And how injurious to us such a system would be we have demonstrated more than once. Here, for instance, is what we wrote in the Economist of July 14th last:—

"Let us compare with the statistics of colonial trade "those of the trade of the United Kingdom. The figures "for 1893, exclusive of the parcel post, are:—

	Imports from £	Percentage of Total. %	Exports to £	Percentage of Total. %
Foreign countries	312,628,000	77·4	198,029,000	71·6
British possessions.....	91,441,000	22·6	78,067,000	28·4
	404,069,000	...	276,096,000	...

"Now Australasia, South Africa, and, in a less degree, "Canada, may think that they can enter into a tariff war "with foreign nations with a light heart. They may argue "that they have little to fear from reprisals, and stand to "gain more than they can lose. We are, however, in a "very different position. What we are asked to do is to "quarrel with the nations who last year took no less than "£198,029,000 worth, or fully 71½ per cent. of our pro-"ducts, in the hope that we may increase our trade with "the colonies by supplying them with a fraction of the "£23,600,000 worth of commodities they now obtain "from foreign countries. Nor is that all. Our "imports consist mainly of food products and of the

"raw material for our manufactures, and bytaxing them "we should at one and the same time enhance the cost "of production here, and cause our products to be sub-"jected to higher import duties abroad. And how the "colonies can expect us to act in so foolish a fashion we "are at a loss to understand." And adducing practically the same figures Lord Jersey arrives at the same conclusion. "What is proposed," he says, "is that the United Kingdom should create a new Customs barrier against foreign produce, and in my opinion the conditions operating on Great Britain, in part indicated by the above statistics, would not admit of the acceptance of this proposition." Indeed, the colonial delegates themselves, while making the proposal, were aware that we could not accept it. "It would appear from the discussions, taking them generally," says Lord Jersey, "that there was no expectation of any immediate departure from the Free-trade policy pursued by Great Britain." The practical outcome of the Ottowa Conference, therefore, is a proposal that we should not only permit the colonies to foster trade between themselves by imposing differential duties upon our products, but that we should give an aunual money grant to enable them the better to carry out that policy. Is that reasonable?

THE COTTON INDUSTRY.

THE Board of Trade returns for November respecting our total shipments of cotton goods show an increase on the same month in the two preceding years. The exports for the past eleven months are very large. Subjoined is our usual table:—

	November. Yards.	Eleven Months Ended November 30. Yards.
1894	448,141,500	4,879,112,100
1893	408,953,700	4,215,939,300
1892	422,715,300	4,453,936,300

Comparing 1894 so far with the same normal period of 1892 we find the following cases of increase in this year, viz.:—

	Yards.		Yards.
Holland	13,300,000	Central America	20,600,000
Belgium	2,400,000	Venezuela	19,300,000
Portugal	8,800,000	Bombay	205,000,000
Greece	2,000,000	Madras	39,800,000
Turkey	63,300,000	Bengal and Burmah	135,000,000
Egypt	68,100,000	Straits	15,100,000
West Coast of Africa (Foreign)	6,500,000	Ceylon	2,900,000
Do (British)	18,800,000	Australasia	22,400,000
		British N. America	3,000,000

The instances of decrease this year on 1892 are as follows:—

	Yards.		Yards.
Germany	2,300,000	United States	12,900,000
Italy	20,000,000	Foreign West Indies	8,700,000
Algeria	7,900,000	Mexico	1,000,000
Philippine Islands	9,400,000	Peru	2,700,000
China & Hong Kong	38,800,000	Chili	58 000,000
Japan	1,300,000	Brazil	38,500,000
Malta	2,500,000	Argentine Republic	54,700,000

India shows enormous figures. Here they are:—

	Eleven Months Ended November 30. 1894. Yards.	1893. Yards.	1892. Yards.
Bombay	852,130,000	625,649,200	647,255,700
Madras	128,404,300	100,202,900	88,616,000
Bengal & Burmah	1,107,075,900	946,687,200	971,983,400
Straits	114,552,900	71,238,300	99,426,900
Ceylon	16,721,300	12,572,200	13,828,900
Total	2,218,884,400	1,756,349,800	1,821,115,900

The shipments to our Eastern dependency for December are expected to be of moderate extent, making the year's total larger, we should say, than in any previous year. At the moment there are, however, few orders "to make" being given out. This slow policy of buying on the part of Indian exporters has been going on now for several weeks past. The result is that manufacturers' order lists are running down to a rather inconvenient extent; in point of fact, there are an increasing number of looms standing idle in the Blackburn and Darwen districts. The explanation of the prolonged sluggishness of demand is put down partly to the large supplies of piece goods held in Calcutta and Bombay, caused by the free shipments throughout the year, partly to the fall in cotton during the last three months, and partly to the fear that the import duties may be imposed early in the first quarter of the new year. In the meantime Lancashire manufacturers of shirtings and the like are getting anxious for new contracts, the outlook being anything but encouraging. The feature of the cloth market is the revival of demand for heavy cloths, such as T'cloths, Mexicans, &c., for the Persian outlet. Most makers of such goods in the Rossendale and Whitworth valleys are now without stock, and fairly well sold.

Our aggregate shipments of cotton yarn so far this year show few changes on the same period in 1892. Here are the figures:—

	November. Lbs.	Eleven Months ended November 30. Lbs.
1894	21,444,000	216,452,100
1893	20,823,900	190,092,700
1892	21,299,600	216,348,300

The countries showing a falling off in takings this year on 1892 are, viz.:—

	Lbs.		Lbs.
Denmark	670,000	Turkey	5,600,000
Belgium	500,000	Japan	7,700,000
France	1,900,000	Bombay	1,400,000
Italy	950,000	Bengal	1,300,000
Roumania	3,100,000		

The cases of increase are:—

	Lbs.		Lbs.
Russia	700,000	Austria	2,000,000
Sweden	600,000	Egypt	1,300,000
Germany	6,400,000	China	1,100,000
Holland	6,400,000	Madras	2,100,000

Yarn of all kinds made from American cotton have been dragging during the month under review. Cottons for home use have lost ground in point of margin, for whilst the raw material is decidedly dearer, weft and twist have kept stationery. As things stand, spinners are doing poorly, the reason being that the supply of yarn has more than overtaken the consumption. The looms, at present idle, have made matters worse for spinners. Bundles for the great Eastern outlets are dull, and move off slowly, even at present low quotations. Bolton fine yarn continue most discouraging.

Taken altogether, cloth and yarn are in a most unsatisfactory state, so far as the demand and margin are concerned. More old-established firms of cotton spinners and manufacturers are going out of existence, there being two instances of this reported this week, one at Stockport and another at Ashton-under-Lyne.

The prospects of the world's supply of the raw cotton material are good, especially for the United States. The yield in America is likely to be very large, but many people are sceptical as to a growth of 10,250,000 bales, as put forth by Messrs Neill Bros. Latest news from Egypt as to long stapled cotton is to the effect that a crop of 5,000,000 cantars may be expected, but the quality of the plant is not quite satisfactory. East Indian cotton will be in large supply, as last year.

The Indian import duties question is again seriously engaging the attention of the United Cotton Manufacturers' Association. It will be remembered that this body arranged a large and influential deputation to Lord Kimberley on the matter last March. The same Association which supported the manufacturers on that occasion will meet in conference in Manchester on Tuesday next, to consider the position of affairs. Mr Tattersall, the employers' secretary, has convened the Conference.

The Raw Cotton Association at Manchester is making progress. A strong board of directors has been appointed. It is said that Liverpool is boycotting Liverpool firms who apply for shares in the Manchester Association.

TRADE NOTES.

The Burma Rice Crop.—The prospects of the Burma rice crop on the 31st October last are thus officially reported upon:—"Revision of last month's figures for the total area under rice cultivation has reduced the amount by which this year's area falls short of last year's total. The decrease is now shown as 27,581 instead of 79,545 given last month. Since the October report was written there has been almost a total cessation

of rain in Lower Burma, with the result that the late-planted crops do not now promise as well as they did. Hanthawaddy, Pegu, and Thôngwa are feeling the absence of the usual final showers more severely than in other districts."

The Production of Iron and Steel in Germany.—The British Iron Trade Association has published the following statistics as to the production of iron and steel in Germany. It is explained that the figures for Luxemburg are included because the Grand Duchy is attached to the German Empire for Zollverein purposes:—

TABLE I.—PRODUCTION of PIG-IRON.

	1893.	1892.	1891.
Number of works	103	109	109
Charcoal pig ..... tons	23,886	26,222	25,548

American Tin-Plates.—The following report as to the production of tin and terne plates has been submitted to Secretary Carlisle by a special agent of the Treasury Department:—"During the quarter ending June 30 forty firms manufactured 46,466,335 lbs of tin and terne, plates proper, against an output of 38,260,411 lbs by thirty-six firms during the previous quarter. Of the output for the quarter, 33,501,344 lbs, or more than 72 per cent., were made from sheets rolled in the United States, and of this amount 32,477,703 lbs, or about 97 per cent., consisted of the class of plates weighing lighter than 63 lbs per 100 square feet. Of the commercial plates manufactured during the quarter, 26,952,996 lbs were coated with tin, and 19,713,339 lbs were terne-coated. The quantity of American sheet iron and steel made into articles and ware, tinned or terne-plated, was 1,807,854 lbs. This makes the aggregate output of tin and terne-plate for the quarter, from all sources, 48,274,189 lbs; that of the previous quarter was 40,423,300 lbs. The production of black-plates in the United States during the quarter was 37,864,901 lbs, and of this amount 32,449,205 lbs, or more than 85 per cent., belonged to the class weighing lighter than 63 lbs per 100 square feet. The production of the previous quarter was 30,070,701 lbs, of which 23,514,881 lbs, or more than 78 per cent., were of the lighter class. The production of American black-plates of the class weighing lighter than 63 lbs per 100 square feet was 8,934,324 in excess of that of any previous quarter. Twenty rolling mills made sworn returns of production, against eighteen that made sworn returns for the quarter preceding. Of the forty firms that made sworn returns of the manufacture of commercial tin and terne-plates, twenty used wholly American plates, with an output of 25,558,798 lbs; five used wholly foreign plates, with an output of 4,700,197 lbs; fifteen used both American and foreign plates, with an aggregate output of 16,207,340 lbs, of which 7,942,546 lbs were made from American black plates. Sixteen stamping or other manufacturing companies that used American sheet iron and steel in the manufacture of articles and wares tinned or terne-plated submitted sworn statements of production, as against fourteen during the previous quarter. The amount of American sheet iron and steel made into articles and wares tinned or terne-plated by years is stated as follows:—

	Lbs.
1894	6,268,203
1893	8,802,681
1892	5,620,867

The quantity of tin-plates and terne-plates imported and entered for immediate consumption, and of such as were imported on and after July 1, 1891, and were withdrawn from warehouse for consumption during the quarter ended June 30, 1894, was:—Tin-plates, 110,505,069 lbs; terne-plates, 9,051,019 lbs; total, 119,556,088 lbs. The quantity of tin-plate and terne-plates on which duties had been paid, and which were used in the manufacture of articles exported with benefit of drawback during the quarter, was:—Tin-plates, 36,501,591 lbs; terne-plates, 54,856 lbs, total, 36,556,451 lbs.

Boiler Explosions.—The annual report to the Board of Trade states that preliminary inquiries or formal investigations, under the provisions of the Boiler Explosions Acts, was held in 104 cases during the twelve months ending June 30 last. That is the largest number dealt with during any similar period since the Act of 1892 came into force, although the loss of life is below the annual average, 24 persons having been killed, and 54 injured. "It is to be regretted," says the report, "that notwithstanding the formal investigations held in this and past years, there has been an increase in the total number of explosions (many, however, being of a trivial nature), chiefly among marine boilers, and in boilers used for heating purposes in churches, chapels, schools, &c. In the latter class there were 21 explosions during the four days, January 5, 6, 7, and 8, due to the freezing of the water in some portion of the circulating pipes, and to the want of caution shown by the attendants in re-lighting the fires before ascertaining whether any obstruction had been caused by ice. As a matter of general interest it

may be well to remind those who are responsible for the management of public buildings which are heated by any kind of water apparatus—and more especially those which are not in constant use—that unless precautions are taken, there is a standing risk of ice forming in the pipes during severe frost. It is advisable that in such cases the boilers should be fitted with efficient means for preventing undue pressure, but in the absence of any such fitting the temperature of the water, if any, in the boiler or connections should not be allowed to fall to the freezing point." The number of formal investigations held during the year was twenty-three. In fifteen cases the Court found the owners or users of boilers directly responsible for the explosions, and in four cases they held them responsible for the neglect of their servants, and they were ordered to pay a portion of the costs and expenses of the investigation. These orders varied in amount from £5 to £60. In three cases the boilers were insured, and in twenty cases they were not insured.

The Trade of Japan.—The Japanese trade returns for September have been published, and show a considerable falling off in the exports, as compared with August, the total value being $9,842,689, as against $11,131,786. The imports, valued at $10,015,622, also showed a decrease against August, when the value was $10,782,848. The exports of specie in September amounted to $593,911, and the imports to $1,692,979. The returns for the nine months ended with September show a marked increase in the value of the raw cotton imported compared with the corresponding period in 1893, the figures being $15,473,054, as against $11,301,941. The imports of machinery, excluding railway rolling-stock, and includin textile machinery, also show a marked increase, the total for the nine months this year being $2,862,870, as against $1,813,888 for the corresponding period last year. The imports of rice, again, were valued at $6,842,204, as against only $1,856,898. A noticeable feature is an increase in the imports of cotton yarn from $5,292,621 last year to $6,741,944. The increase in the imports of mousselines from $1,835,014 to $2,346,404 is also noteworthy. The exports of silk show a very large increase, the declared value being $25,644,877, as against $16,256,054 in the corresponding period of 1893. The exports of coal were valued at $4,900,090, as against $3,463,152, and the exports of copper at $4,852,725, as against $3,253,640 in the nine months of 1893.
